

Week	Topics
1	Introduction to Programming and Python
2	Python User Interface - Programming Environment Data Types, Variable, Mathematics, Arithmetic Indexing
3	Linear Coding-Variable. Number. Operators. Format (2) Array of variable. Boolean Expression and Operators.
4	Strings
5	Iterations, Loops, (for and while)
6	Conditional Structures (if, elif)
7	Conditional Structures (if, elif)
8	Functions
9	Functions (2)
10	Objects and Class
11	Numpy/Matplotlib
12	Numpy/Matplotlib (2)
13	Advance Topics
14	Advance Topics
